1. 「—」 is not suitable for emergency shelter due to the nature of the disaster.

2. ※1 Safety place can be higher than the second floor (rooftop) depending on the condition of the disaster.

3. ※2 It is located in the area flooded by the tsunami, however the structure of the building is RC (Reinforced concrete structure) or SRC (Steel Reinforced Concrete structure) with more than three-story. The evacuation site is 2nd floor or higher. The evacuation space for Kawagoe-cho Flood Control Warehouse is the roof.

4. The designated evacuation shelter may not be open depending on the situation of the disaster or the damage condition of its building.
